

# Negative Ions Clothing made in Japan for Healthy Living

Negative Ions are electrically charged particles that float in the air around us all the time. The air near the mountains, waterfalls, beaches and forest are among the places where ionization is in complete and natural balance. These types of environments make us feel calm, relaxed and rejuvenated. Negative ions increase oxygen flow to the brain, keeping us more alert, improves our memory and mental energy. Negative ions are needed to balance out the positive ions found in polluted air, food, electricity, smog, and stress which are bad for our health.

Negative ions are always beneficial. Although our body has its own ability to detoxify itself naturally, wearing Negative Ion Clothing helps to pull out the excessive positive charged toxins that the human body just can't handle. This unique clothing has no side effect or expiration date. It can detoxify your body, improve and preserve your health therefore, helping to reduce the intake of harmful medications that can or may affect other parts of our organs. The more layers of Negative Ion Clothing you wear, the healthier you may become.

Gaining knowledge of the benefits of wearing Negative Ion clothing will help you to appreciate the value for optimum health and increasing the chances for a productive and ideal quality of life. A known fact: "Many people dedicate their lives to accumulate wealth, ignoring their health then in their golden years they spend their wealth trying to buy their health."

According to the Asian Medical Journal,

If the amount of negative ions per cubic centimeter of air is:

At 1,000-2,000 cc the human body could remain healthy

At 5,000-10,000 cc the human body can improve resistance to disease and improve immunity.

At 100,000-500,000 cc the human body can produce "natural self healing power".

You can have a healthy body, just by changing your clothes, you must try it!

## ***4 Amazing Effects of Negative Ion Clothing:***

### **1. Purifies Blood and Increases Circulation**

Calcium ions in the body determine the pH of your blood. A healthy person should have a pH of 7.35 – 7.45 which is determined by 4 mg of calcium ions per 100 cc of blood. Negative ions have the ability to help normalize the calcium ion in the blood and bring the pH to slightly alkaline. Wearing Negative Ion Clothing can purify your blood from Acidic to slightly alkaline.

### **2. Rejuvenate Cells**

Our body are made of cells. Through tiny passage ways in the cell membranes, a cell is able to absorb nutrients from the blood and remove waste. When blood is acidic, these membranes harden and cause blockage of the passage ways. The cell either dies or mutates. When wearing Negative Ion Clothing it will change the blood to be more alkaline, the cells then perform these two major functions. Cancer cell cannot live in alkaline blood.

### **3. Strengthen the Immune System**

By rejuvenating and strengthening the cells, negative ions boost our immune system. A strong immune system can quickly detect and destroy viruses and bacteria via increase antibody production.

### **4. Regulate Autonomic Nerves**

Autonomic nerves are nerves that you cannot consciously control such as heart beat, respiration, blood circulation, digestive system, and metabolism. Negative ions can relax and normalize the autonomic nerve functions. **Example of autonomic nerves problems:**

- Insomnia (Sleeping problems).
- Poor Circulation
- Constipation
- Aches and pains
- Breathing problems.
